# SparKit™

Order Online at

**dwyermast.com**

**The easy, economical way to replace masts and booms on sailboats up to 25 feet!**

Dwyer Aluminum Mast Company was established in 1963 to manufacture high-quality aluminum sailboat spars at realistic prices. Over the years, we have built a reputation among sailboat builders, riggers, marine dealers, and owners as a leading manufacturer of spars, rigging and hardware. As a result, Dwyer products can be found on dinghies, daysailers, and small cruisers throughout the world. Put this experience and responsibility to work for you... order your SparKit today.

### **Kit includes:**

- Spar Extrusion
- Fittings
- Fasteners
- Rivet Tool
- Assembly Guide

### **How to order online:**

1. Log on to **www.dwyermast.com**
2. Click on **masts** or **booms** from the menu, then choose the spar cross-section that matches (or closely matches) the spar you wish to replace.
3. Specify your tube length and sailfeed location, and add the tube to the cart.
4. Scroll down and select your spar fittings, adding each to the cart.
5. Click on the **SparKit Option** and add it to the cart.

*Your SparKit™ will arrive complete, including all the right fasteners for the components you selected. The customized Assembly Guide will help you build your new spar in a few hours...with professional results.*

*Select from our comprehensive line of classic and modern spar sections and fittings.*
